THURSDAY, NOVEMBER 5TH
10:00 - 11:30 A.M.

This year's report includes findings on the impact of COVID-19 on THP-NMD and THP-Plus participants: 38% of employed youth lost their jobs and 32% experienced a reduction in hours (70% total) due to the pandemic.

THP-NMD and THP-Plus remain of critical importance during the pandemic, offering stable housing to participants. Unfortunately, not all youth can access these programs, with the waiting list for THP-NMD reaching 490 youth as of July 1, 2020, a 44% increase from the year prior, and the waiting list for THP-Plus at 529 youth.

Utilizing demographic and outcome data from the THP-NMD and THP-Plus Participant Tracking Systems and a statewide survey of the programs' providers, the report includes information about numbers of youth served by the programs statewide, in addition to a wide range of youth outcomes.
